Students pursuing IT, cybersecurity, or digital innovation careers.	Introduces computer systems, software, and digital literacy for modern workplaces. Students pursuing IT, cybersecurity, or digital innovation careers.	3,700€

Learners must:

- Be 18 years or older at the start of the course
- Possess GCSE-level education or equivalent (secondary school completion)
- Applicants without formal qualifications may be accepted based on relevant work experience or an internal assessment.

English requirements:

Demonstrate English proficiency *(minimum B1–B2 CEFR). This may be evidenced by:

- Duolingo English Test with a score of around 90 or above (approximately B2 CEFR level), or
- Equivalent prior study or professional experience in English, or
- Successful completion of EuroPolytech Academy's internal English assessment.

* OTHM is a UK-based awarding organisation that designs and regulates professional qualifications across multiple sectors. It is approved and regulated by Ofqual, the UK government's qualifications regulator, which ensures its diplomas meet national standards.

Programmes & Fees

Level 4 qualifications regulated by Ofqual (UK). These are qualifications positioned at the same academic level as the **first year of a UK undergraduate degree**. They are part of the Regulated Qualifications Framework (RQF), which ensures consistency, quality, and recognition across educational providers.

COURSE TITLE	DESCRIPTION / FOCUS AREA	IDEAL FOR	FEES (€)
OTHM LEVEL 4 DIPLOMA			
<u>Level 4 Diploma in Business Management</u>	Provides a strong foundation in business and management, developing confident, independent thinkers who are “business-ready.” Covers core areas such as business operations, global business environments, finance and accounting, communication, leadership, and team working.	Learners beginning their business or management journey, aspiring supervisors or team leaders, early-career professionals seeking structured business knowledge, and individuals planning to progress to higher-level business or management qualifications.	4,200€
<u>Level 4 Diploma in Cyber Security</u>	Builds a solid theoretical and practical foundation in cyber security. Covers core areas such as cyber-risk awareness, computer science fundamentals, mathematics for security, IT systems, computer architecture, networks, and operating systems.	Aspiring cyber-security professionals, entry-level IT staff, career-changers moving into security roles, and learners planning to progress to higher-level cyber security or computing qualifications	4,200€
<u>Level 4 Diploma in Health and Social Care Management</u>	Develops the core knowledge, understanding, and practical skills needed for supervisory and managerial roles in the health and social care sector. The qualification blends theory with applied learning, covering equality and diversity, professional development, patient assessment, resource management, communication, and health and safety.	Early-career care practitioners aiming to progress into supervisory roles, individuals transitioning into health and social care management, and learners planning to advance to higher-level qualifications in care leadership or healthcare administration.	4,100€
<u>Level 4 Diploma in Information Technology</u>	Provides a broad foundation in core IT disciplines, including cybersecurity, programming, web and mobile development, networking, systems analysis, and digital information management. Prepares learners for diverse entry-level roles in the tech sector.	Aspiring IT professionals, career-changers entering the tech field, and learners planning to progress to higher-level computing or cybersecurity qualifications	4,200€
<u>Level 4 Diploma in Tourism and Hospitality Management</u>	Introduces core concepts in tourism and hospitality, blending theory with practical application. Covers academic and research skills, the tourism and hospitality business environment, industry development, services marketing, consumer behaviour, sustainability, and event management.	Aspiring tourism or hospitality supervisors, individuals entering the industry, career-changers seeking a structured introduction, and learners planning to progress to higher-level tourism, hospitality, or business management qualifications.	4,000€
